

MADE IN BRITAIN

YOUR GUIDE TO BRITISH MANUFACTURING IN THE AUTOMOTIVE AFTERMARKET

Made in Britain brings together 2,000+ British manufacturers by their licensed use of the official collective mark – which they display on their products, packaging and marketing materials (both physically and online) to identify and promote their items as truly British-made and achieve more sales as a result. Made in Britain member companies in the auto sector range from global brand Vauxhall to smaller brands such as Esprit Windscreen Repair Equipment Ltd and Duel Auto Care. Introduced in 2014, the Made in Britain official collective mark is today recognised by 66% of British businesses and 50% of consumers, according to research conducted in 2023.

ESPRIT: A MADE IN BRITAIN PARTNER

Since Esprit was established in 1981 we have always been a keen supporter of British manufacturing, and we've now been a member of Made in Britain for over three years. Our kits and components have been manufactured in Britain for over 40 years, and we also try to source most of the components that go into our products from British suppliers.

Manufacturing and purchasing in Britain means that we have control over the excellent quality of our goods. It also means we can be agile when responding to demand. We've also built up strong relationships

with our British suppliers over many years; this means that when we need things in a hurry, we can pick up the phone to someone we know.

Being part of Made in Britain means that our customers know they can trust that these are high quality British made goods, and membership of the MIB group also means being introduced to other British companies and suppliers.

AUTOSCENE'S PICK OF COMPANIES MANUFACTURING IN GREAT BRITAIN

MILLERS OILS: A TRADITION OF EXCELLENCE

Millers Oils stands as a proud testament to British excellence, with a legacy deeply rooted in the craftsmanship of the United Kingdom. As a company that has been manufacturing high-quality oils and lubricants since 1887, Millers Oils exemplifies the British commitment to precision, innovation, and reliability.

What sets Millers Oils apart is not just the exceptional quality of their products but also the unwavering dedication to keeping its manufacturing processes within the borders of Britain. In an age where outsourcing has become common, Millers Oils decision to stay true to its British roots is a commendable choice that resonates with a sense of national pride. By producing their oils on home soil, the company not only supports the local economy but also reinforces

the reputation of British manufacturing on the global stage.

Every bottle of Millers Oils carries with it a legacy of expertise and a tradition of excellence that has been honed over decades. As consumers, you can take pride in knowing that the lubricants powering your engines and machinery are not just of the highest quality but are also a testament to the ingenuity and craftsmanship of the British workforce.

In a world of choices, Millers Oils stands as a testament of British manufacturing, reminding us all that there is something truly special about products made in Britain.

AUTOELECTRO: LOYALTY TO COMMUNITY

At the heart of Autoelectro beats a legacy deeply rooted in a three-generation British-Kenyan heritage. Through economic peaks and valleys, a stalwart of the Bradford community, it has remained steadfast in its dedication to the UK. It proudly upholds remanufacturing operations. This commitment is not strategic; it's a reflection of its genuine belief in British craftsmanship, quality, and work ethic.

Through navigating economic shifts and technological progress, Autoelectro has resisted the temptation of offshoring, choosing instead to invest in its local economy by supporting organisations and people, and contribute to – a sense – of national pride. Its decision to remanufacture in the UK for almost 40 years is a

testament to its commitment to the highest standards on these shores.

Autoelectro continues to celebrate its history, the profound connection between family, business and country – its home. As a renowned member in rotating electrics circles – and the wider automotive aftermarket and local society – Autoelectro is so much more than a supplier of starter motors and alternators; it is a protector of its roots and workforce.

EEC: A BRITISH FIRST

The late John Clark entered the automotive aftermarket as a distributor of exhausts way back in 1973 and took the insightful step to launch European Exhaust & Catalyst Ltd. in 1997 as the first British producer of catalytic converters for the automotive aftermarket. Since then, John strategically increased the breadth and depth of production capability through both investment and acquisition, encompassing all key processes within a British manufacturing base.

The creation of our Revcoat Technologies facility in Waterlooville, Hampshire back in 2006 introduced unique processes and brought unrivalled technical product expertise that to this day remains unmatched by our peers, both in Britain and abroad. Prolazer Components Ltd. located in Stone, Staffordshire

facilitated the reshoring of precision engineered components while bringing significant reductions in development lead times. Leading the charge today, Paul Clark, Managing Director, draws together the combined strengths of a highly experienced, competent team and class-leading manufacturing operations to produce genuinely best in class product of the highest standard.

Operating from three locations in the UK and from an additional facility in France, European Exhaust & Catalyst Ltd. proudly develops, manufactures, and distributes British product both within the UK and across the world.

CATACLEAN: EXPORTING FUEL ADDITIVES

Cataclean's proud British heritage, standing as a paragon of automotive excellence since its inception in 1995. Multiple winners of Northern Powerhouse Export champion, Cataclean manufactures in the UK supplying distributors around the world from Germany to Australia.

This automotive additive embodies the integrity and quality synonymous with British engineering. From its conceptualization to the present day, Cataclean has remained steadfast in its commitment to the domestic

market, contributing to the nation's automotive legacy.

The product's "Made in the UK" distinction underscores a dedication to superior innovation, resonating with consumers who value the authenticity and reliability of products born from the rich automotive tradition of the United Kingdom.
